

KVM Switch

Manage/control four USB computers from one keyboard, monitor and mouse

Model
157032

The INTELLINET NETWORK SOLUTIONS™ KVM Switch is a 4-port compact KVM Switch with audio and mic switching functionality. Its USB support on the console side allows you to use a USB keyboard and mouse. It comes with four sets of detachable USB KVM combo cables and four sets of audio/mic cables for SOHO and office desktop multimedia applications. And it allows you to access, control, boot and reboot four USB-enabled multimedia computers with only one USB keyboard, mouse, monitor and optional speaker set with microphone, using the Switching Software Client installed on your PCs.

Win-based Switching Software Support on PC

The KVM Switch also provides a Win-based Switching Software that shows you the current active PC and allows you to select PC as well as configure keyboard hotkeys. It appears as an icon on the system tray of your Windows desktop, and will change its number icon upon switching to show the active PC port. Using this small client software, it will give KVM users utmost convenience and control.

Audio and Microphone Switching Offers Uninterrupted Multimedia Experience

The audio and microphone switching function of this KVM Switch allows you to leverage the multimedia systems on each of your four computers. You can monitor the audio/mic input/output of each computer without plugging on and off the audio/mic cables. User can also choose to use either independent/simultaneous switching of both PC channel and audio/microphone channel for their maximum convenience. And it takes only one set of speakers with microphone instead of one set for each computer. Furthermore, it offers you user-programmable simultaneous/independent PC and audio/mic switching functionality for flexible multimedia and KVM switching operation.

USB Interface Compatibility for Multi-platform Support

The USB interface technology offers multi-platform support for PC, Macintosh G3/G4 and iMAC. (The KVM Switching Software client supports only Windows platforms).

Zero Cabling Hassles for KVM Users

This KVM Switch saves you cabling troubles with its four 1.5 M detachable KVM and four audio/mic cables. In fact, you have zero cabling troubles since you don't have to worry about finding suitable cables to fit — They come within the box package!

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all INTELLINET NETWORK SOLUTIONS products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

LIFETIME WARRANTY

Model 157032
